(Please write your Enrollment Number) Enrollment No._____

MID-TERM EXAMINATION
(Course Nam: B. Tech.) (Semester: 7th)
(October 2024) OFF LINE mode

Subject Code: BAI 403	Subject: Computer Vision
Time : 1 ½Hours	Maximum Marks :30

Note: Q1 is compulsory. Attempt any two parts of Q2 and Q3

Q1		(2.5*4=10)	CO Mapping
a)	What is batch normalization?	2.5	1
b)	Why we use regularization?	2.5	1
c)	Why we do parameter sharing?	2.5	2
d)	What is computer vision? Why is vision so difficult? Provide two real world examples.	2.5	1
	UNIT I		CO Mapping
Q2	Attempt any two parts	(5*2=10)	
a)	How gradient descent as an optimization algorithm used in computer vision?	5	2
b)	How weights are updated in Stochastic Gradient Descent algorithm?	5	1
c)	How does KNN algorithm work and how do we choose the factor 'K'?	5	1
	UNIT II		CO Mapping
Q3	Attempt any two parts	(5*2=10)	
a)	How feature learning is performed in CNN?	5	1
b)	How transfer learning be effectively utilized for domain-specific task?	5	2
c)	Explain VGG-16 architecture.	5	1
