(Please write your Enrollment Number) Enrollment No. 04801172022

End-Term Examination
(CBCS)(SUBJECTIVE TYPE)(Offline)
Course Name: <B. Tech. (AI&ML/CSE-AI) (Reappear – ECE-AI), Semester: <8th>
(May, 2026)

Subject Code: BAI 404	Subject: Social Media Analytics
Time :3 Hours	Maximum Marks: 60

Note: Q1 is compulsory. Attempt one question each from the Units I, II, III & IV.

Q1		(2.5*8=20)
a.	Why is visualization important in analyzing large social network data? Mention any two benefits.	2.5
b.	A node acts as a bridge between two groups in a network. Identify the relevant network measure and explain its importance.	2.5
c.	Explain the concept of Clickstream Analysis.	2.5
d.	Identify whether the following belong to link analysis or network evolution, and justify: • Predicting future connections • (ii) Studying how networks grow over time	2.5
e.	Identify whether the following are input metrics or performance metrics, and justify: • Number of posts • Click-through rate • Engagement rate	2.5
f.	Explain the concept of Facebook Analytics.	2.5
g.	Explain Collective Classification.	2.5
h.	Explain the concept of data processing and visualization in social media analytics.	2.5
	UNIT I	
Q2	a) Explain the concept of nodes, ties, and influencers in social network analysis. b) Explain how graphs and matrices are used to represent social network data.	(10)
Q3	a) Explain the concept of Social Media Analytics (SMA). Discuss its importance in modern organizations. b) Explain the social media landscape. Discuss different platforms and their role in analytics.	(10)
	UNIT - II	
Q4	A company wants to compare two versions of a webpage to determine which one performs better in terms of user engagement and conversions. Identify the method used and discuss its design, implementation, and advantages.	(10)
Q5	a) Explain Web Crawling and Indexing. Discuss how they help in collecting and organizing social media data.	(10)

	b) Explain the role of Natural Language Processing (NLP) in micro-text analysis. Discuss its applications in social media platforms.	
	UNIT III	
Q6	Explain the process of measuring and analyzing social media campaigns. A company launches a campaign and wants to evaluate: • Number of users who viewed the content • Number of users who interacted with the content Identify the metrics used and explain their significance.	(10)
Q7	a) Explain the process of social media campaign analysis. Discuss goal setting, tracking, and evaluation. b) Explain Network Analysis in social media platforms. Discuss how it helps in identifying communities and influencers.	(10)
	UNIT IV	
Q8	a) Explain the process of data processing and visualization in social media analytics. b) Discuss how visualization helps in deriving insights.	(10)
Q9	a) Explain the role of Python in social media analytics. b) Discuss tools and libraries used for data collection, analysis, and visualization.	(10)
