Which feature of human mindset best explains this behavior? i. Our minds' strongest intuitions are often wrong ii. Our minds do not think in absolutes; they judge outcomes relative to reference points iii. Our minds are built to get used to things iv. We do not realize that our minds are built to get used to things	
	UNIT I	
Q2	How is happiness conceptualized within the field of positive psychology? Discuss its core characteristics and critically evaluate the major theoretical perspectives that explain nature and pursuit of happiness.	(10)
Q3	Students studying in a cluttered, poorly lit room reported feeling tired and unmotivated, while those using a clean, green courtyard felt energized. Using this contrast, evaluate how environmental factors affect subjective well-being. Recommend improvements to create student-friendly learning spaces.	(10)
	UNIT II	
Q4	A group project at IGDTUW faced delays. One student, Meera, consistently motivated the team using her strengths of hope and perseverance. Analyze how Meera's strengths contributed to team well-being and project success. How can others identify and cultivate similar strengths?	(10)
Q5	Using Veenhoven's Life Quality Matrix, analyze the key determinants that influence life satisfaction among students at IGDTUW in the above scenario. What insights does this framework offer for understanding and improving student well-being?	(10)
	UNIT III	
Q6	When faced with multiple deadlines, Kiara tends to procrastinate, complain, and focus on what might go wrong intensifying her stress. Her friend Tanya approaches the same situation with a problem-solving mindset: she breaks tasks into smaller goals, stays optimistic, and seeks help when required. Compare the mindset and approach of Kiara and Tanya. How do their coping strategies influence their stress levels and outcomes? What practical steps can Kiara take to shift from negative to positive mindset?	(10)
Q7	Reflect on your personal experience with maintaining a gratitude journal. In what ways can the practice of gratitude journaling serve as a tool for emotional regulation and resilience during difficult times?	(10)
	UNIT IV	
Q8	Aarti bought the latest smartphone after months of planning. While she felt an initial surge of excitement, the pleasure quickly faded, and she soon began looking for the next upgrade. Using Aarti's experience, explain the difference between short-term pleasure and long-term happiness. Why does pleasure fade so quickly in such situations, and what strategies can Aarti adopt to shift her focus from momentary excitement toward more enduring happiness?	(10)
Q9	What is "miswanting," and how does it influence human decision-making and overall life satisfaction? Illustrate your answer with real-life examples and suggest practical strategies to reduce the effects of miswanting.	(10)
