MID-TERM EXAMINATION
(Course Name : B. Tech, MAE/DMAM/Reappear) (Semester : 4)
(March, 2024) OFF LINE mode

Subject Code: BMA 208	Subject: Thermal Engineering -II
Time : 1 ½Hours	Maximum Marks : 30
Note: Q. 1 is compulsory.	

Q1		(2.5*4)	
	(a) Explain the effect of clearance on reciprocating air compressor.	UNIT-1	
	(b) Explain the static and total head in centrifugal air compressor.	UNIT-1	
	(c) Describe the detonation and Knocking process.	UNIT-2	
	(d) Which engine is having higher efficiency at different compression ratio and why?	UNIT-2	
Q2	(Attempt any Two Parts) UNIT-1		(5,5)
	(a) Explain the surging and choking of compressor with the help of curve.		
	(b)Explain the isothermal, adiabatic and polytropic compression in reciprocating air compressor.		
	(C) Describe the multistage compressor with intercooler.		
Q3	(Attempt any Two Parts) UNIT-2		(5,5)
	(a) Explain the actual indicator diagram.		
	(b)Describe the battery ignition system for SI engine.		
	(C) Explain the working of 4 stroke diesel engine with the help of diagrams.
