MID-TERM EXAMINATION
(B. Tech. AI&ML/CSE-AI) (Semester – 4th)
(March, 2024) OFF LINE mode

Subject Code: BAI - 202	Subject: Computer Networks
Time : 1 ½Hours	Maximum Marks : 30
Note: Q. 1 is compulsory.	

Q1		(2.5*4)	
	(a) Distinguish between a Point to Point link and a broadcast Link.		
	(b) List out the main responsibilities of Data Link layer?		
	(c) What is CSMA? Explain the different persistence methods of CSMA.		
	(d) What is Piggybacking in Computer Networks?		
Q2	**(Attempt any Two Parts) UNIT-1**	(5,5)	
	(a) Contrast and compare ISO- OSI and TCP/IP networking models.		
	(b) What is the difference between Port address, Logical address and Physical address ? Explain with an example.		
	(c) What is Unguided Media ? Explain different types of Unguided media.		
Q3	**(Attempt any Two Parts) UNIT-2**	(5,5)	
	(a) The message 11001001 is to be transmitted using the CRC polynomial X^3+1 to protect it from errors. What is the message that should be transmitted ?		
	(a) A Cluster of stations share 48 Kbps of pure Aloha Channel. Every Station outputs frames of length 1024 bits on an average of every 50 seconds. Then what is the maximum value of number of stations?		
	(c) Describe mechanism of sliding window protocol ?
